

NOVUS[®] MACHINE

- Fast
- Simple to Use
- Unique Air Transfer Cushions
- Does Not Require Compressed Air

One of FP International's group of PMOS (packaging materials on site) systems, the NOVUS packaging machine eliminates the need for storage and handling of pre-made packaging and traditional bubble material. Imagine. . .one packaging system can replace paper, foam-in-place or bubble.

The NOVUS air cushion machine uses an internal air source to inflate innovative, pre-configured, medium-density polyethylene film, producing four different air cushion shapes. The four different cushion configurations fill in a wide variety of packing applications.

The versatile NOVUS machine can be used anywhere, from high speed, on-line pack stations to small packing table operations. The machine can be placed on a pack table, on a conveyor line with its optional stand, or used with an optional winder to produce bundled material for use at multiple pack stations. For added flexibility, a built-in timer on the NOVUS machine can be set to run cushions to fill a bin or other storage containers.

The NOVUS machine is fast, producing 20 metres of air cushions per minute. It's easy to operate and can be plugged in anywhere (240 volts). Film loading is easy; just place the roll of film on rollers instead of inserting the roll onto a mandrel. The NOVUS machine has a small footprint, only 560mm long, 305mm wide, 580mm high, and weighs 26 Kilos.

NOVUS Machine

NOVUS Machine on optional Stand with optional Winder

NOVUS Double Cushion[™]

Cushion Size: 150mm x 480mm*
Use this NOVUS cushion for large void fill applications and to block and brace.

* These dimensions are per foot to per foot, not inflated.

NOVUS Supertube[™]

Tube Size: 150mm x 480mm (2 tubes) *
This size NOVUS cushion is especially good for void fill, wrapping applications and to wrap corners. Use just this one product for multiple applications.

NOVUS Quilt-Air[™] Small

Quilt Size: 150 x 600mm *
Use small NOVUS bubble instead of traditional bubble material for interleaving and wrapping. One roll of NOVUS film inflates to the equivalent of five 300mm rolls of traditional bubble.

NOVUS Quilt-Air[™] Large

Quilt Size: 150mm x 480mm *
Use NOVUS Quilt-Air Large when large bubble is needed. One roll inflates to the equivalent volume of eight 300mm rolls of traditional large bubble. Perfect for void fill or wrapping.
